OUR KEYHOLE HOME

Keyhole Studios is a wedding photography and film company.

We are based in a custom built space in Huyton, Liverpool.

Founders, Kris and Eugene McDonald, have built this company on strong traditional values, with the belief that quality and service is the most important element of everything we do.

Our ambition has always been to give our clients the best possible experience and this is why we have invested so much into our equipment and car hire.

We have been in the wedding industry for over 16 years, shooting thousands of weddings.

Our parent company Keyhole Productions, produces a substantial number of corporate films and television items.

Our experience in media far surpasses many other wedding photographers in the city.

It is this experience we believe that sets us aside from our competitors.

You can rest assured knowing that we have a team of full-time staff with many years of experience in all forms of high-end photography and film production.

At Keyhole, we produce memories that you will keep for the rest of your life, sharing them with friends and family and generations to come.

With multiple packages available, each one created to suit your requirements.

We recommend visiting us at our studio and exploring everything that we have to offer.

From the moment you book, our customer service advisor will be on hand to ensure you will receive 100% service and assistance every step of the way.

We are very proud that we have been able to build our business to the scale which has allowed us to purchase and design our new home from scratch. Making a state of the art space for our photography and film post-production work to take place and where our clients can come and view everything we offer under one roof.

We look forward to welcoming you all!

DESTINATION WEDDINGS

Our photography & videography team are used to traveling up and down the country for various weddings and corporate shoots. Whether that be in a city hotel in London or a quiet village hidden away somewhere at the Lakes, wherever there is a wedding we will happily travel to it.

Destination weddings are increasingly popular and the locations couples are choosing to get married are growing yearly. Over the years we have flown all over the world with our cameras, from long haul flights to the States and Hong Kong through to shorter trips like Paris and Italy.

We love to travel and when the wedding season comes to an end we are generally on a flight to some new part of the world, exploring is a dream most of us have, and doing this with a camera is a dream come true for us.

Destination weddings give us the luxury of a new canvas to create our imagery, usually a location is chosen for a specific reason, the architecture of Italy, the mountains of the French Alps or more personal reasons of a specific spot. We will work with you to understand what's special about your chosen country and ensure to encapsulate everything you love about the place in the photographs.

It's a little harder to price a destination wedding as we have to factor in travel, additional time and more often than not additional coverage.

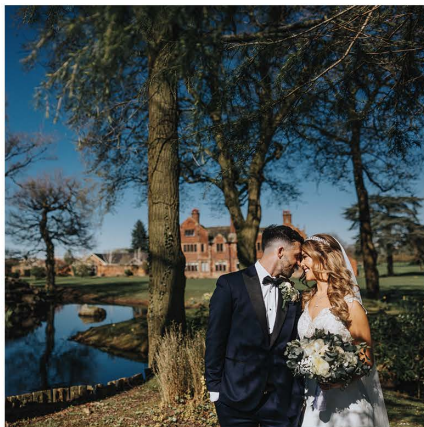

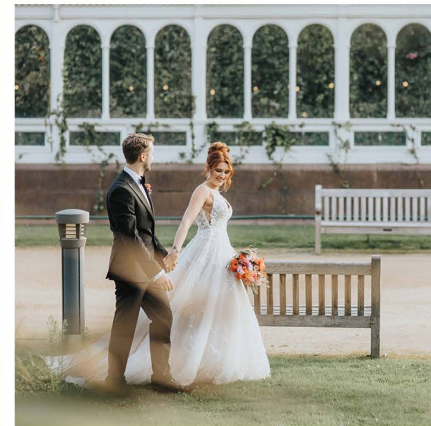

Perhaps a pre wedding meal may take place the evening before the big day, or a post wedding trash the dress shoot on the beach. Our aim is to fully understand what you are looking for from your photographer and film maker, then create an offering where we are with you every step of the way.
